

This is an image of LOFAR HBA. To generate this image, I used 280 subbands (56 MHz bandwidth) of the region of J1441+1331. This image has been generated by self-calibration using selfcal.py standalone tool. The resolution of this image is 5", the noise is 0.5 mJy and the thermal noise is 0.2mJy. The fov of this image is 4°x1.6°.
